Profometer PM8000 Family

Profoscope successor

SPOT

- Rebar location, Find the safe spot to drill, Check minimum cover, Estimate diameter, Detect metal
- Statistics on spot measurements
- Provide additional info such as pictures, geolocation

Profometer PM8000 Family

Profoscope+, PM600 & PM630* AI successors

SPOT

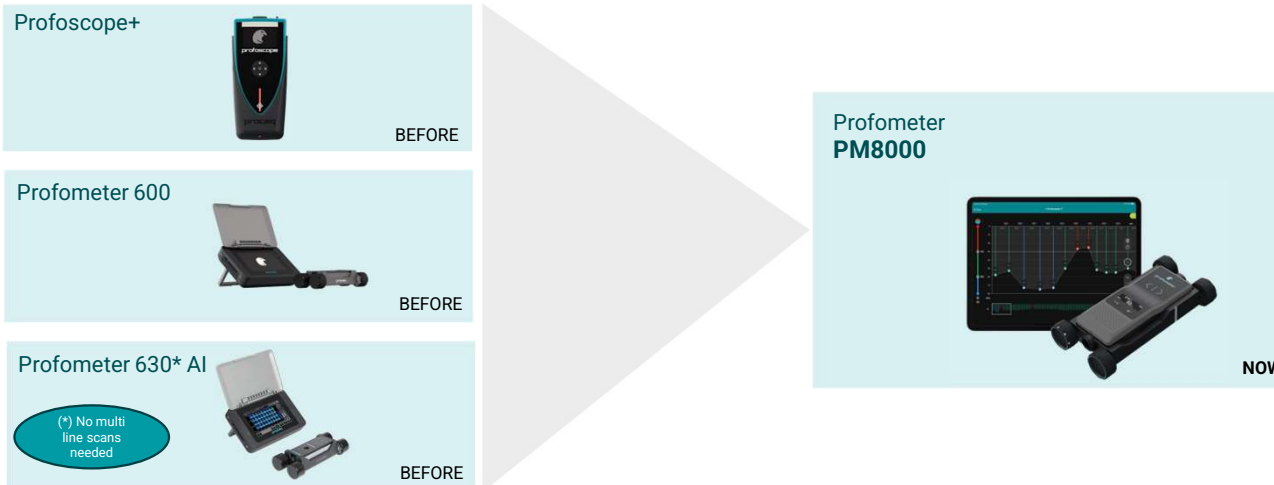

Rebar location, Find the safe spot to drill, Check minimum cover, Estimate diameter, Detect metal

- Statistics on spot measurements
- Provide additional info such as pictures, geolocation

SCAN

Durability & structural resistance assessment, Large quality control

- Line scanning concrete cover, rebar spacing & diameter values, Statistics
- Provide additional info such as pictures, geolocation

Profometer PM8000 Family

PM630 & PM650 AI successor

SPOT

Rebar location, Find the safe spot to drill, Check minimum cover, Estimate diameter, Detect metal

- Statistics on spot measurements
- Provide additional info such as pictures, geolocation

SCAN

Durability & structural resistance assessment, Large quality control

- Mapping concrete cover, rebar spacing & diameter values
- Advances statistics and heat maps
- Provide additional info such as pictures, geolocation

Profometer 630 AI

Multi line scans needed
